

# KASH INFRASTRUCTURE

# ABOUT US

Kash Infrastructure is the brainchild of our founder Mr. Manish Bodar driven by core values of integrity, commitment and loyalty to customers. Kash Infrastructure is one of the growing construction company engaged in providing Civil Engineering Services.

Established in Ahmedabad, (Gujarat) India in the year 2010, we "Kash Infrastructure" is engaged in providing various kind of civil construction service that include Civil Construction works, Roads, Highways & Industrial Roads, Laying Service, Interiors and Exteriors services. These are offered as per the requirement of our esteemed clients. We use high quality raw material throughout our service in every field as we are one of the renowned quality centric organization and quality is our prior aim. Our team of experts and professional engineers are gaining experience from past many years in the field of civil engineering. Further our team is managed and guided by our expert mentor Mr. Manish Bodar who has achieved excellent exposure in civil engineering services by providing complete client satisfaction. We use latest and high-performance machinery & equipment in our services. We provide these services in various parts of the country and make a permanent relationship with our esteemed clients.

In Kash Infrastructure, we believe that there is no better proof of a commitment to service than a project which demonstrates the integrity of its builder. What we do for a living is not especially unique. What we believe is unique.

'KASH' has rapidly acquired a brand image as a "quality conscious and reliable premium contractor".

Our pledge is to establish lasting relationships with our customers by exceeding their expectations and gaining their trust through exceptional service by every member of our team. We provide value-added construction services to our customers by creating a successful partnership with them throughout the construction process.

Kash Infrastructure aims to encourage innovation, teamwork, professional integrity, commitment, up gradation of knowledge and skills of employees and a safe working environment.

## Our Strengths:

- Proven track record to take up big size projects.
- Meeting and exceeding customer expectations of quality and completion dates.
- Highly qualified management team and experienced employee base.
- Strong Order Book

## HSE POLICY:

The management team of Kash Infrastructure is committed to provide both safe working conditions and protection against health risk to all the employees and others involved in its activities and members of the public who comes in the purview of such activities. The company has zero tolerance for accidents by diligent management, complete awareness, providing safety related training during induction to all its employees, and periodical inspection of all aspects related to providing conducive work environment.

Kash Infrastructure is committed to and has continual evolving policies in levels of health and safety performance. Conduct all construction activities in a manner to prevent any accidents, minimizing risk to personnel and property, protect the environment and enhance company reputation.

## OUR MISSION

Our mission is to consciously face Bigger Challenges in the field of construction industries and deliver promises with strong adherence to ethical business practices. To provide construction and engineering services with creative approach, within budget and within time line.

# BUSINESS AREAS

## 01 IRRIGATION AND HEAVY CIVIL PROJECTS

One of the main activities of the Company. Kash Infrastructure has enjoyed many years of success in this sector of Civil and Infrastructure works. Kash Infrastructure provides full range of services which include:

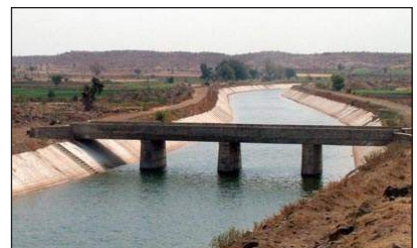

- Excavation of Canals, Deep-cuts
- Minor Dams, Spillways, Bridges
- etc.

In an era of advanced technologies and new techniques, Kash Infrastructure continuously strives for innovation and enhanced efficiency to carry out the full spectrum of Irrigation and Heavy Civil Projects. Urban or municipal infrastructure refers to hard infrastructure systems generally owned and operated by Government Department such as streets, water distribution, and sewers, Treatment plants. It may also include some of the facilities associated with soft infrastructure, such as parks, public pools, schools, hospitals and libraries. The term public works includes government owned and operated infrastructure as well as public buildings (Hospital, etc)

## 02 ROADS AND BRIDGES

Roads and Highways development are essential for any nation's economic growth. With inherent skills and resources to develop and execute high magnitude Infrastructure development projects, Kash Infrastructure has ventured into Road, Highways & Bridge construction sector and entered subcontract with major companies for state highways. The highway division was initiated by our company realising its core strength of time and material management, quick decisive responses in wake of troubleshooting situations with negligible time lag and at the same time delivering quality execution and performance. The work force team comprises of multitasking employees to ensure timely completion and breakeven between finance and quality. All our projects have been completed well ahead of the scheduled time period.

# BUSINESS AREAS

## 03 WATER SANITATION AND SEWERAGE

Kash Infrastructure has ventured into water sanitation and sewerage sector directly or with joint venture partners.

## 04 BUILDING/PROJECT CIVIL WORK

Our company has been in this domain since inception. We have in-house capabilities for planning and designing various types of buildings and also utilize services of highly qualified and renowned experts/consultants in the field of management, engineering and architecture as and when the situation demands. Our professional and experienced team is adept to deal with projects of large magnitude during all stages backed up with sufficient machinery and tools at their disposal to ensure timely completion of the projects.

## 05 PIPE LAYING

The water supply projects/water distribution system may consist of pipe laying work either MS, Ductile Iron Pipes or PVC pipes. The civil engineering background behind implementing pipe laying work shall be depending on the various circumstances.

# OUR OFFICE

It began as a small entity that undertook building projects. Within a decade, our endeavours today, currently span across construction of residential and office properties, industrial facilities, highways and other types of infrastructure.

We are one of the fastest growing infrastructure organizations with rich and varied experience in executing landmark projects across India.

Kash Infrastructure's growth can be directly attributed to its propensity to adopt, endure and remain credible amongst all its competitors. Kash Infrastructure has diversified into taking up large projects by directly participating in tenders and as well as entering into strategic alliance with various reputed construction companies for joint ventures.
